SITES READY FOR DEVELOPMENT

RAPID RESPONSE, CITY OF COLORADO SPRINGS ECONOMIC DEVELOPMENT

Rapid Response is a formal program of the City of Colorado Springs to expedite the review and approval of Land Use Applications and construction documents for building permits. Generally, Rapid Response is available to companies expanding or locating new facilities in Colorado Springs. Rapid Response designation is determined during initial discussions with the City's Economic Development Department.

Rapid Response typically begins with an initial meeting attended by the project consultant team and other project representatives, and representatives of all reviewing agencies. The purpose of the meeting is to introduce the project team to the representatives of the reviewing agencies, familiarize the reviewing agencies with the project, and to establish a line of communication between the project team and the appropriate subject matter experts with the reviewing agencies.

Every submittal or resubmittal to a reviewing agency associated with a Land Use Application or construction documents for a building permit is expedited for immediate priority review. Rapid Response not only reduces the overall approval timeline, but it also provides for increased communication and collaboration.

MARKET OVERVIEW

WHY COLORADO SPRINGS?

Colorado Springs is a top destination for growing companies, known for its pro-business environment, fast-growing workforce, and industry leadership in sectors like aerospace, defense, and cybersecurity. With a low cost of living, access to major markets, and a high quality of life, companies and talent are flocking to this thriving city. Ranked as one of the best places to live, it's set to become Colorado's largest city by 2050, making it an ideal hub for growth and opportunity.

PEAK

INNOVATION PARK

TESTIMONIALS

"I was attracted to Colorado Springs and more specifically, Peak Innovation Park, because of its business climate and community. The Flywheel Capital team was intrigued by the business park and was excited about an opportunity to be early in its success as Urban Frontier had recently become the City's development partner. In addition, we continue to be impressed by the Aerospace industry and its associated ecosystem within Colorado. We are also interested in the benefits available through the Opportunity Zone and other benefits to our partners. In short, we continue to be excited about Peak Innovation Park and its potential to offer local and national companies an attractive business environment and we want to be part of that success."

- Ben Hrouda, CEO/Managing Principal, Flywheel Capital

"Since 2018, SunCap has successfully completed three (3) industrial developments in Colorado Springs. More specifically, we have developed two (2) industrial projects totaling approximately 400,000 square feet and the City of Colorado Springs and Urban Frontier have been great partners to work with. They allow developers to achieve successful outcomes by committing to and meeting their times frames and by providing actionable feedback that is market based and reasonable. In short, the City of Colorado Springs and Urban Frontier are great stewards of property values as they understand their responsibility to protect Peak Innovation Park's future by fostering development in the present."

- Mike Orr, Senior Vice President, SunCap Property Group
